c#

I'm not sure if this is a strange thing to do or not, or if it is some how code smell...but I was wondering if there was a way (some sort of oop pattern would be nice) to "cast" a base type to a form of its derived type.

## How to return only the Date from a SQL Server DateTime ...

@user1671639 the datetime data type always contains both a date and a time, you can't sensibly store one without the other - unless you're using SQL Server 2008, in which case there are also separate 'date' and 'time' data types.
