## **MCSD Analyzing Requirements: Exam 70**

MCSD: Analyzing Requirements came out before Microsoft released its Analyzing Requirements and Defining Solution Architectures exam (70-100). As a result, this book does not adequately cover the material on the test, which is one of the elective exams you can take on your way to earning a Microsoft Certified Solution Developer (MCSD) rating.

HTTP handlers allow you to inject logic based on the extension of the file name requested, they are executed based on file extensions, URLs and HTTP verbs. HTTP modules are event driven and inject logic before a resource is requested. Some ways to differentiate when to use which: serve requests for specific URL/extensions => Http handler applies to all requests based on arbitrary rules => Http ...
