R-401A refrigerant CHANGEOVER PROCEDURE 1. The system should be thoroughly leak tested with the R-12 refrigerant still in the system.

R

Performance: • Very similar capacity, higher glide • Similar evaporator pressure when average evaporator temperature is the same as R-12 • Head pressure runs higher. Lubricant Recommendation: Compatible with a combination of mineral oil and alkylbenzene or polyolester lubricants.

Freon™ MP39 (R

Freon™ MP39 refrigerant. Freon™ MP39 is an HCFC retrofit refrigerant for R-12 in stationary positive displacement air-conditioning and refrigeration systems such as walk-in coolers, beverage dispensers, vending machines, and supermarket systems. Field experience has shown that no oil change is needed in many unitary and close-coupled systems.

Replacement for R12 Refrigerant or Freon 12 (R12) Replacement

Replacements for R12. The other two refrigerants that are considered good replacements for R12 are R-401a and R-401b. R-401A is the mixture by weight of 53% of R-22, 13% R-152a and 34% R-124. It is good replacement for R12 in the applications where the evaporator temperature is -23 degree C and above.
